

Capital Region Water (CRW) Technical Meeting
Thursday, July 23, 2020, 2:00 PM
Agenda

1. What EPA Needs for an Approvable Long-Term Control Plan
 - The LTCP should provide a demonstration of the CSO volume capture percentage that has been determined through the cost-benefit analysis process required under the 1994 CSO Policy.
 - The Plan should describe how CRW will meet water quality standards and the first goal for that is showing how CRW will meet the 85% capture
 - Implementation Schedule
2. Priority CSO Sewershed Projects
 - When does CRW plan on initiating these projects?
 - How long will these projects take?
3. Provide a revised Hydraulic and Hydrology Model Project that provide calibration and validation parameters.
4. Next Step
